

Train the Trainer Epilepsy Awareness with Midazolam Competency

Setting the highest standards in epilepsy training

Teach others to understand and treat epilepsy

Train the Trainer – Epilepsy Awareness with Midazolam Competency will enable you to teach others the signs to look for when treating epilepsy, how to manage the condition and how to administer Midazolam when needed.

This in-depth course will allow you to train employees within your own organisation, or in external organisations, in epilepsy awareness, assess their knowledge and sign off their competency to recognised standards.

Course content

The Train the Trainer – Epilepsy Awareness with Midazolam Competency course will combine powerful training techniques with expert medicines knowledge to empower you to confidently and successfully lead your own training course.

- What is epilepsy and its impact?
- The physiology of nerve impulses and the brain
- Incidence and prevalence of epilepsy
- Causes of and diagnosis of the disease
- Symptoms
- Types of seizures
- Treatment options and medication
- Basic first aid
- Emergency treatments
- Trainers will receive in-depth knowledge of epilepsy and carry out practical assessments, including the buccal administration of Midazolam.

This in-depth course covers a wide curriculum to ensure that trainers can deliver courses that will empower others to safe practice in epilepsy awareness.

Who is this course designed for?

Train the Trainer – Epilepsy Awareness with Midazolam Competency is designed for senior healthcare professionals, managers and independent trainers who will be leading courses within their own organisation, or in external organisations.

Participants will be able to deliver up-to-date, half-day courses with practical assessments following their training.

Train the Trainer Epilepsy Awareness with Midazolam Competency Course (Cont'd)

Course Duration

Train the Trainer – Epilepsy Awareness with Midazolam Competency is a comprehensive two-day course. During the course, please allow for a duration of eight hours for the day, which includes lunch and breaks.

Course Outcome

Trainers will have an in-depth understanding of epilepsy, including managing the condition, dealing with a seizure, signs to look for and the buccal administration of Midazolam. They will be able to train other healthcare workers and carers in epilepsy awareness, including competency assessment to a high level to ensure safe practices are followed.

The course will teach training and confidence skills alongside medical awareness to support the future delivery of engaging courses by trainers.

Trainers will take away all the resources they need to deliver their own training including notes, slides and competency paperwork.

This course more than met my expectations. it was the most engaging training course on Epilepsy I have ever had. Fantastic knowledge and great trainer.

Dominic Green, Medacs Care
